Active Distance Alert and Monitoring

## Monitor Social Distancing & Get Back to Business

*Open Safely, Responsibly, Quickly.*

### Manage and Monitor Social Distancing

FastSensor's suite of ADAM Solutions allows you the ability to safely, securely, and anonymously determine pain points in your organization so you can optimize your space with safety - and business - in mind.

### Build Confidence and Trust

Make the health of your employees and customers your top priority and reduce your legal liability with active social-distance monitoring that is Globally Privacy Policy Compliant.

## Active Distance Alert and Monitoring

### Keep Your Business & Employees Safe

#### Prioritize the Health and Wellness of Your Employees

With active social distance monitoring and contact tracing through personal wearable devices you can rest assured that your employees are safe and where you need them most... out in the workspace!

#### Real-Time Haptic Technology Notifications

Manage live social distancing compliance with buzzing alerts delivered through FS-844W wearable to warn employees of potential proximity violations while logging the violation locally.

#### Contact Tracing Data and Support

Quickly enact contact tracing procedures and mitigation measures based on logged interactions offline with FS-844W or online between active badge or wearable devices.

#### Modernize Your Facility and Improve Operational Efficiency

ADAM coupled with optional behavioral analytics can help to better understand your space, how to manage employee and equipment workflow, and to eliminate costly supply chain bottlenecks and clusters.
